1) The following corrections need to be made to the indicated claims.

In claims 43-46, line two of each claim, the word "that" should be deleted.

In claim 38, line two, "intranasal" should be changed to –intranasally--.

In claim 55, line three, the spelling of "steary!" should be corrected.

- 2) Claim 58 is objected to as being a duplicate of claim 38 since claim 58 does not appear to further limit claim 38, i.e. the "vaccine composition" of claim 38 is required to contain as a component the "antigen or antigenic composition" recited in claim 58.
- *3)* The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- **4)** The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5) Claims 38-64 are rejected under 35 U.S.C. 102(e) as being anticipated by or under 35 USC 103 as being obvious over Modi et al (U.S. 5,653,987).

Modi et al describe the intranasal administration of a combination of an antigen and a surfactant which is the same as the surfactant depicted in formula (I) of instant claim 38. See col. 3, line 57 – col. 4, line 3; col. 4, lines 29-38; col. 2, lines 66-67; col. 2, lines 12-28. Modi et al anticipate the method of instant claim 38 for the reason that the intranasally delivered composition is the same in both the reference and the instant claims. The intended effect recited in the preamble of instant claim 38 does not limit the actual **method** which requires **the intranasal administration of the same composition** used by Modi et al. The open-ended "comprises" terminology of instant claim 38 does not exclude additional components in the "vaccine composition" such as an additional "absorption enhancing compound" of Modi et al.

The features of the dependent claims are either specifically described by the references (e.g. for the concentration ranges of claims 56 and 57, see col. 4, lines 29-33; for the polyoxyethylene 9-lauryl ether of claim 55, see col. 2, lines 66-67; for the HIV, herpes, and influenza antigens (etc.), see col. 3, line 57 –col. 4, line 3) or constitute obvious variations in parameters which are routinely modified in the art (e.g. for the selection of other well known equivalent polyethylene ethers and esters of claim 55, see col. 2, lines 35-53) and which have not been described as critical to the practice of the invention.

The claim 64 method of preparing the composition is described at col. 4, lines 22-28 of Modi et al.

The packaging of reagents in kit form such as in the conventional spray device of claim 62 is an obvious expedient for ease and convenience in assay performance.

action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of

the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from

the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date

of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

shortened statutory period, then the shortened statutory period will expire on the date the advisory

action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing

date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX

MONTHS from the date of this final action.

7) Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Mary E. (Molly) Ceperley whose telephone number is (703) 308-4239. The

examiner can normally be reached from 8 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Long Le, can be reached at (703) 305-3399. The fax phone number for responses to be filed BEFORE

final rejection is (703) 872-9306. The fax phone number for responses to be filed AFTER final rejection is

(703) 872-9307.

Questions which are NOT RELATED TO THE EXAMINATION ON THE MERITS, should be directed

to TC 1600 CUSTOMER SERVICE at (703) 308-0198. Any inquiry of a general nature or relating to

the status of this application or proceeding should be directed to the receptionist whose telephone

number is (703) 308-0196.
